

AUTODESK 2017 REVIT ADVANCED

Building Information Modelling (BIM) is an approach to the entire building life cycle. Autodesk Revit® is a powerful BIM programme that support the ability to coordinate, update, and share design data with team members throughout the design, construction, and management phases of the building's life. A key component in managing the BIM process is to establish a company foundation for different types of projects by creating standard templates and custom elements.

What we cover in this course:

- Importing & exporting files
- Linking files
- Conceptual design
- Creating advanced components
- Design & analysis
- Revit Architecture work sharing
- Working with professionals
- Advanced rendering
